LUIS FLORES

(956) 662-3710 · laf3288@utexas.edu · Austin, TX

Senior Marketing & Business Analytics student at UT Austin specializing in Agentic AI Workflows and Technical Product Marketing. Expert at bridging the gap between LLM infrastructure and consumer-facing strategy. Proven track record of building automated market intelligence systems using Python and multi-model APIs (GPT-4o, Claude 3.5 Sonnet) and validating product-market fit through high-stakes direct-to-consumer sales.

EDUCATION

The University of Texas at Austin *Aug 2023 – May 2026*
Bachelor of Business Administration, Marketing · Austin, TX

- Relevant coursework: Digital Marketing Strategy, Market Research, Consumer Behavior, Brand Management, Integrated Marketing Communications.
- Self-directed focus: AI applications in marketing — built and documented AI-augmented research and content tools across four semesters.

TECHNICAL AI ARCHITECTURE & PROJECTS

Agentic Survey Intelligence System | *Python, OpenAI/Anthropic APIs, SeleniumJan 2025 – Present*

- Architected a multi-agent system that automates the market research lifecycle: persona generation from psychographic data through autonomous survey completion on Qualtrics and Typeform.
- Implemented dynamic prompt engineering and output validation layers to ensure data integrity and reduce hallucinations in consumer simulation.
- Developed a technical whitepaper and product demo showing how AI-driven synthetic users can compress market validation cycles by 70%.

Autonomous Competitive Intelligence Engine | *RAG (Retrieval-Augmented Generation)Sep 2024 – Dec 2024*

- Built a tool that scrapes competitor digital footprints to generate real-time SWOT analyses and messaging-gap reports for enterprise marketing teams.

Programmatic Content Strategy Pipeline | *Python, Multi-Platform AutomationAug 2024*

- Engineered an AI content engine that maintains consistent brand voice across multi-platform editorial calendars, automating drafts of 30+ unique assets per batch.

EXPERIENCE

Service Professional — Olive Garden*Apr 2024 – Present*
Senior service role — shift-lead scope: training, escalation handling, and floor operations · Austin, TX

- Promoted into Olive Garden's Service Professional role — a senior, shift-lead-equivalent position trusted to train new servers, handle guest escalations, and support management on the floor during high-volume service.
- Explain menu, pairings, and modifications to 60–80+ guests per shift, translating detailed operational information into language guests understand — the same skill required to translate technical features to customers.
- Personalize recommendations based on guest signals, consistently driving upsell performance — audience-aware messaging applied in real time.
- Coordinate across kitchen, host, and management workflows to execute service for large parties of 20+, managing quality, timing, and communication under pressure.

TECHNICAL SKILLS & PROFICIENCIES

AI Architecture: Agentic Workflows, LLM Orchestration, RAG (Retrieval-Augmented Generation), Prompt Engineering, Synthetic User Testing.

Developer Stack: Python (Automation/Scripts), API Documentation, HTML/CSS (Basics), Git/GitHub, MCP (Model Context Protocol) Servers.

Product Marketing: Go-To-Market (GTM) Strategy, Technical Writing, Product Demo Design, Persona Mapping, A/B Testing Roadmap.

Tools & Platforms: OpenAI/Anthropic SDKs, Google Analytics, CRM (Salesforce/HubSpot), Adobe Creative Suite.
