AI CONTENT ENGINE

30-Day Editorial System for Red Bull

A complete AI-augmented brand content system: evolved brand voice framework, 30-day multi-platform editorial calendar, AI prompt library, and documented human-refinement workflow.

PROJECT BRIEF

Project Overview

This project demonstrates a complete AI-powered content production system built for Red Bull. Rather than producing individual content pieces in isolation, the goal was to build a **repeatable, scalable system** that any brand manager or content team could adopt and run consistently. Every content decision is grounded in real strategic insight — not generic AI output.

€9.8B	40%	30 Days	7
Red Bull Global Revenue (2023)	Identified Female Market Gap	Full Content Calendar	AI Prompt Templates

DELIVERABLES

Three Integrated Deliverables

01

Brand Voice Guide (.docx)

Evolved voice identity for Red Bull including 5 voice attributes (current vs. proposed), do's & don'ts table, vocabulary guide, platform tone matrix for all key channels, and AI master prompts. Editable Word document for team distribution.

02

30-Day Editorial Calendar (.xlsx)

Full month of content across 3 platforms with hooks, caption drafts, CTAs, and visual direction for each post. Includes Voice Quick Reference sheet and AI Prompt Library sheet for ongoing use.

03

Content System Case Study (this PDF)

Portfolio-facing documentation of the full system: strategic rationale, AI workflow transparency, 5 before/after content examples showing prompt → refined output, and system documentation for onboarding team members.

STRATEGIC FOUNDATION

Why Red Bull Needs an Evolved Voice

The starting point for any content system is a clear-eyed analysis of where the brand stands and where its audience is going. Red Bull's brand intelligence surfaced structural gaps that this content system was designed to address:

GAP	EVIDENCE	CONTENT STRATEGY RESPONSE
Gen Z Authenticity	Over-polished content underperforms vs. raw competitor content on TikTok. Ghost engagement rising.	Week 1–2 content uses POV, low-production, and UGC formats intentionally.
Female Audience Gap	Celsius and Alani Nu are capturing Red Bull's female market share with inclusive content strategies.	Week 3 content explicitly addresses inclusion; personas include female athletes and creators.
TikTok Underperformance	TikTok-native content lags vs. YouTube and Instagram in Red Bull's mix. The discovery platform is left underdeveloped.	TikTok hooks engineered for the algorithm: 6-word-or-fewer hooks, trending sound strategy, duet/stitch mechanics.
Ingredient Transparency	73% of Gen Z check ingredients before purchase (NielsenIQ 2024). Red Bull avoids the topic entirely.	Week 3 content directly addresses ingredients with a confident, honest brand voice — turning a liability into trust.

AI WORKFLOW

How the System Was Built

The AI content engine is a structured workflow where AI accelerates research, drafting, and iteration — while human judgment controls strategy, tone calibration, and final quality.

STEP	TOOL / METHOD	WHAT AI DID	WHAT I DECIDED
1. Brand Research	WebSearch + Synthesis	Ran 10+ searches on Red Bull positioning, market share, competitor strategies, and consumer sentiment.	Identified the strategic gaps. Chose which gaps to address and in what content order.
2. Voice Framework	Claude (LLM)	Generated draft voice attributes, vocabulary options, and platform tone descriptors.	Evaluated against brand reality. Rejected off-brand drafts. Rewrote attributes that felt generic.
3. Calendar Content	Master Prompts + LLM	Generated initial hook, caption, and CTA drafts for all content days using the master prompt library.	Refined every hook for brand-specific voice. Replaced generic outputs with real cultural and product specifics.
4. Prompt Library	Prompt Engineering	Tested 20+ prompt variants to find formulas that reliably produce on-brand output.	Selected final prompts based on output quality and brand accuracy. Documented negative constraints.

CONTENT EXAMPLES

Before/After Content Examples

Each example shows the AI prompt used and the human-refined final version. The refinement notes explain the strategic reasoning — this is the difference between AI-generated and AI-augmented content.

1 INSTAGRAM

PROMPT / INPUT

Write a Red Bull Instagram Reel caption. Show a female athlete training at 5am. Tone: bold, raw, second-person. Max 5 lines. Include a time reference.

REFINED OUTPUT

She's up before the sun. Before the noise. 5am is hers. And Red Bull is right there with her. Tag a woman who runs at 5am.

Human refinement: Removed 'before the world tells her what she can and can't do' — preachy, not on-brand. Replaced with a tighter rhythm and kept the …

2 TIKTOK

PROMPT / INPUT

Write a TikTok hook for Red Bull content about the 3pm energy slump. 6 words or fewer. Generate 3 options.

REFINED OUTPUT

Option 1: It's 3pm. You know. (5 words) Option 2: Your 3pm is real. (5 words) Option 3: 3pm hits different every time. (6 words)

Human refinement: Kept Option 1 — most direct. Tested each hook against the 6-word constraint and TikTok's first-frame retention behavior.

3 LINKEDIN

PROMPT / INPUT

Write a LinkedIn brand insight post. Topic: Red Bull's Gen Z content strategy gap. Insight-first headline, 4–5 sentences, end with a question. ~150 words.

REFINED OUTPUT

Red Bull built the world's most watched YouTube channel by making extreme sports feel accessible. But on TikTok — where Gen Z actually discovers brands in 2025 — the strategy isn't translating. The gap: high-production content doesn't perform on an algorithm built for authentic, participatory, lo-fi moments. The brands winning right now (Ghost, Celsius, Alani Nu) film on phones and invite their communities in. What would a lo-fi Red Bull even look like?

Human refinement: Original was strong. Adjusted the opener from passive to active framing and added specific competitor names for credibility.

4 INSTAGRAM

PROMPT / INPUT

Write a caption for a Red Bull UGC spotlight. Fan: Devin, 19, motocross, Texas, self-taught, 8 months of DMs. Celebratory but authentic. 5 lines max.

REFINED OUTPUT

Devin has been sending us his motocross clips for 8 months. No sponsor. No agent. Just pure love for the ride. Today we finally said yes. This is what Red Bull is actually made for — the riders no one has heard of yet. Welcome to the team, Devin. @devin_handle

Human refinement: Preserved 'today we finally said yes' — emotionally strong. Added 'the riders no one has heard of yet' to widen the aspirational frame.

5 INSTAGRAM

PROMPT / INPUT

Write a caption about Red Bull's ingredients. Tone: direct, honest, slightly self-aware. Address the myth that people don't know what's in it. 4 lines.

REFINED OUTPUT

Yes, there's caffeine. Yes, it works. Here's what's actually in the can: caffeine, taurine, B vitamins, and your choice of sugar or not. That's it. We've been the same formula since 1987. Not hiding anything. Never were. What do you want to know?

Human refinement: Restructured to lead with confidence, not defensiveness. Added '1987' as a brand heritage anchor.

HOW TO USE THIS SYSTEM

Briefing a Junior Team Member

A well-built content system should be teachable. This brief explains how to onboard a junior content coordinator to operate the AI Content Engine independently.

To create a new month of content:	1. Start with the Brand Voice Guide. Read sections 2–4 before writing anything.
	2. Open the AI Prompt Library sheet in the Excel calendar. Pick the prompt for the platform.
	3. Replace [BRACKETED PLACEHOLDERS] with the specific topic, athlete, or moment.
	4. Paste the prompt into Claude or ChatGPT. Generate 3 variants.
	5. Evaluate against the Do's and Don'ts. Ask: does this sound on-brand or generic?
	6. Refine: add a specific name, date, place, or detail that makes it feel real.
	7. Drop into calendar with visual direction notes. Mark as Draft → ready for scheduling.

OUTCOMES + POSITIONING

What This Project Demonstrates

SKILL DEMONSTRATED	EVIDENCE IN THIS PROJECT	ROLE RELEVANCE
Content Strategy	30-day calendar built around 4 specific strategic gaps identified in the brand audit. The theme architecture has a logic — it is not random content.	Brand Marketing, Content Marketing
AI Tool Fluency	7 engineered prompts with negative constraints, style guidance, and platform-specific formatting rules. Not just 'ask AI to write it.'	All marketing roles, 2025+
Brand Voice	Full voice framework built from brand intelligence, not guesswork. Can explain why each word choice was made.	Brand, Content, PMM
Systems Thinking	Three coordinated deliverables (voice doc, calendar, case study) that work as an integrated system — not three separate projects.	Marketing Ops, Growth, PMM

Resume Bullet: "Designed an AI-powered content production system for Red Bull, including an evolved brand voice framework, 30-day editorial calendar across 3 platforms, 7-template AI prompt library, and documented human-refinement workflow — enabling scalable, consistent content output."
